Education

VIT Bhopal University Bhopal, India
B.Tech in Computer Science (AI & ML) | CGPA: 8.74 2023 – 2027

Technical Skills

Languages: Python, C++, HTML5, CSS3, SQL
AI/ML & data: TensorFlow, PyTorch, Keras, Scikit-learn, Pandas, NumPy, Matplotlib
Computer Vision: OpenCV, YOLOv8, MediaPipe, face_recognition, Tesseract OCR, Depth Estimation
Databases & Cloud: SQLite, Supabase , AWS Cloud Services
Tools & Version Control: Git, GitHub
Relevant Coursework: Data Structures & Algorithms, Machine Learning, Artificial Neural Networks, Linear Algebra, Probability & Statistics, DBMS, Object-Oriented Programming, Cloud Computing

Experience

FOSSEE – OSDAG, IIT Bombay May 2026 – Present
Summer Intern Mumbai, India

- Contributing to OSDAG under FOSSEE, IIT Bombay by working on structural engineering software and engineering application development.
- Developing and improving UI/backend workflows using Python and related technologies.
- Collaborating on open-source software modules focused on scalable engineering workflows and automation.

Projects

EchoVision – Real-Time Edge Vision Assistant | GitHub *Python · Depth-Anything V2 · OpenCV · Piper TTS*

- Depth-based hazard detection using Depth-Anything V2; 30 FPS at 640×480, <200 ms latency.
- 3-region spatial engine (L/C/R) with Piper neural TTS and 15/30/45 degree turn guidance.
- Implemented modular Python architecture with cooldown logic to suppress duplicate real-time alerts.

FaceID Attendance System | GitHub *Python · OpenCV · face_recognition · Supabase*

- Real-time face recognition system (OpenCV): 97% accuracy, sub-200 ms per-frame latency.
- Offline encoding pipeline with session-scoped deduplication, eliminating 95% of duplicate entries.
- Dual-storage architecture (local CSV + Supabase PostgreSQL) enabling multi-location attendance tracking.

Automatic Number Plate Recognition (ANPR) | GitHub *Python · YOLOv8 · Tesseract OCR · OpenCV*

- YOLOv8 + Tesseract OCR pipeline: 90%+ accuracy on 2,000+ video frames at 30 FPS.
- 95% consistent plate localization across varied lighting conditions and angles.
- Modular design with decoupled detection and OCR stages for scalable, high-throughput processing.

Achievements

Finalist – Inya.ai Buildathon (NASSCOM Initiative) Oct 2025
Team Dikastirio | Track: Airlines Booking and Status

- Built Hermes, a bilingual AI flight assistant enabling bookings, cancellations, and live flight status queries across voice, chat, and SMS platforms.

Certifications & Activities

- **Cloud Computing** – NPTEL, IIT Kharagpur (Jan–Apr 2025)
- **Introduction to Internet of Things** – NPTEL, IIT Kharagpur (Jan–Apr 2026)
- **Machine Learning Specialization** (3-Course Program) – DeepLearning.AI & Stanford University
- Design Team Member – AWS Cloud Club, VIT Bhopal University (2024–2025)
